

Sample Benchmarks for Demonstrating Successful Performance

Class # _____

Group # _____

Date _____

Students will receive a rating of Satisfactory (S) or Unsatisfactory (U) for their performance for each of the following Enabling Learning Objectives. Students must satisfactorily complete each objective to successfully complete course requirements.

Learning Objective	Satisfactory	Unsatisfactory	Student Self-Check	Instructor Comments
EH 0001 Follow National Incident Management Systems (NIMS) concepts and principles when performing assigned tasks as a team during simulated emergency or post disaster conditions.				
EH 0002 Use personal protective equipment (PPE) provided in the course for safely responding to, and facilitating recovery after, a simulated disaster event (according to Hazardous Waste Operations and Emergency Response Standard HAZWOPER, 29 C.F.R. § 1910.120, and National Fire Protection (NFPA) 472 Chapter 6 standards).				
EH 0003 Assess drinking water safety in a simulated post-disaster environment; recommend alternatives to provide safe drinking water, and interventions and counter measures to restore drinking water to Environmental Protection Agency (EPA) standards.				
EH 0004 Assess a failed wastewater containment system in a simulated disaster environment and make recommendations to disinfect the site, prevent further

contamination, and provide safe wastewater disposal.				
EH 0005 Assess a mass feeding facility in a simulated post-disaster environment using provided guidelines; identify environmental health and safety considerations and propose interventions as needed.				
EH 0006 Assess an operational shelter in a simulated post-disaster environment using the CDC Environmental Health Assessment Form for Shelters, and recommend interventions to ensure environmental health and safety of the shelter population.				
EH 0007 Based on a pre-assessment briefing, identify environmental health and safety issues in a community affected by simulated disaster impacts, recommend remediation actions, and provide input to decision-makers regarding re-occupancy.				
EH 0008 Recommend key information regarding environmental health restoration for public health leadership to disseminate to the general public following a simulated disaster event.
